CLINICA CHIMICA ACTA, VOL. 96 (1979)

AUTHOR INDEX

Abeliuk, P., see Yatziv, S. (96) 67
Ahmed, S., see Bachorik, P.S. (96) 145
Albers, J.J., see Bachorik, P.S. (96) 145
Amla, I., see Latif, K.A. (96) 131
Angelo, F., see De Pirro, R. (96) 9
Arora, R., see Jackman, H. (96) 15

Bachorik, P.S., Wood, P.D.S., Williams, J., Kuchmak, M., Ahmed, S., Lippel, K. and Albers, J.J.
Automated determination of total plasma cholesterol: A serum calibration technique (96) 145
Biserte, G., see Perini, J.M. (96) 205
Boak, J., see Dawson, J. (96) 37
Borulf, S., Lindberg, T. and Månsson, M.
Immunochemical determination of cathodal elastase in human duodenal juice (96) 215
Breslow, N., see Sizaret, P. (96) 59

Carr, G. and Wilkinson, A.W.
The excretion of iron and chromium by children with burns and scalds (96) 73
Cividalli, G., see Yatziv, S. (96) 67

Dawson, G. and Golomb, H.M.
Fatty acid differences amongst leukemia cell types, with special reference to hairy cell leukemia. A preliminary report (96) 85
Dawson, J., Smith, G.D., Boak. J. and Peters, J.J.
γ-Glutamyl transferase in human and mouse breast tumours (96) 37
De Pirro, R., Milani, C., Angelo, F. and Renato, L.
Aggregation-induced stability of dexamethasone receptors in rat kidney (96) 9
Dubowitz, V., see Statham, H.E. (96) 225

Endert, E.
Determination of noradrenaline and adrenaline in plasma by a radioenzymatic assay using high pressure liquid chromatography for the separation of the radiochemical products (96) 233

Furuyama, J., see Okada, S. (96) 281

Golomb, H.M., see Dawson, G. (96) 85
Grimley, P.M., see Rich, S.A. (96) 113
Gunn, W.G. see Laker, M.F. (96) 265

Hann, J., see Taylor, C.M. (96) 1

IFCC (1979) Section 2 (96) 155F
Approved recommendation (1978) on quantities and units in clinical chemistry 157F
Approved recommendation (1978) on list of quantities in clinical chemistry 185F
Ito, M., see Kuroda, Y. (96) 139

Jackman, H., Arora, R. and Meltzer, H.Y.
Comparison of platelet count and platelet protein methods for determination of platelet MAO activity (96) 15
Jackowski, S., see Wacholtz, M.C. (96) 255
Jaya Rao, K.S., see Mohan, P.S. (96) 241

Kahane, I., see Yatziv, S. (96) 67
Kamei, S., Okubo, A. and Yamanaka, M.
Apoenzyme of aspartate aminotransferase isozymes in serum and its diagnostic usefulness for hepatic diseases (96) 97
Kasidas, G.P. and Rose, G.A.
A new enzymatic method for the determination of glycollate in urine and plasma (96) 25
Kato, T., see Okada, S. (96) 281
Kero, M., see Kuutti-Savolainen, E.-R. (96) 43
Kuchmak, M., see Bachorik, P.S. (96) 145
Kudoh, T., see Minami, R. (96) 107
Kuroda, Y., Ito, M. Ogawa, T. Takeda, E., Toshima, K. and Miyao, M.
A new sensitive method for assay of histidase in human skin and detection of heterozygotes for histidinemia (96) 139
Kuutti-Savolainen, E.-R. and Kero, M.
Enzymes of collagen biosynthesis in skin and serum in dermatological diseases. I. Enzymes of the skin (96) 43
Kuutti-Savolainen, E.-R.
Enzymes of collagen biosynthesis in skin

and serum in dermatological diseases II. Serum enzymes (96) 53
Kobayashi, K., see Niwa, T. (96) 247
King, G.S., see Lax, P.M. (96) 269

Laker, M.F. and Gunn, W.G.
Natural occurrence disqualifies mannitol as an internal standard when urinary monosaccharides are determined by gas-liquid chromatography (96) 265
Latif, K.A., Amla, I. and Rama Rao, P.B.
Urinary excretion of arylsulfatases in malnourished/vitamin A deficient children (96) 131
Lax, P.M., King, G.S., Pettit, B.R. and Sandler, M.
3-*O*-Methylated catecholamines in human urine: improved gas chromatographic assay (96) 269
Lebas, J., see Perini, J.M. (96) 205
Lindberg, T., see Borulf, S. (96) 215
Lippel, K., see Bachorik, P.S. (96) 145

Maeda, K., see Niwa, T. (96) 247
Månsson, M., see Borulf, S. (96) 215
Mawer, E.B., see Taylor, C.M. (96) 1
Meisler, M. and Reinke, C.
A sensitive fluorescent assay for *N*-acetyl transferase activity in human lymphocytes from newborns and adults (96) 91
Meltzer, H.Y., see Jackman, H. (96) 15
Milani, C., see De Pirro, R. (96) 9
Minami, R., Kudoh, T., Oyanagi, K. and Nakao, T.
Neuraminidase activity in liver and brain from patients with I-cell disease (96) 107
Miyao, M., see Kuroda, Y. (96) 139
Mohan, P.S. and Jaya Rao, K.S.
Plasma somatomedin activity in vitamin A deficient children (96) 241

Nakao, T., see Minami, R. (96) 107
Niwa, T., Ohki, T., Maeda, K., Saito, A., Ohta, K. and Kobayashi, K.
A gas chromatographic-mass spectrometric assay for nine hydroxyphenolic acids in uremic serum (96) 247

Ogawa, T., see Kuroda, Y. (96) 139
Ohki, T., see Niwa, T. (96) 247
Ohta, K., see Niwa, T. (96) 247
Okada, S., Kato, T., Yutaka, T., Yabuuchi, H. and Furuyama, J.
A simple method of lysosomal hydrolase assay in a single somatic cell and its application (96) 281
Okamura, K.
Derivative electrophoretograms and their applications (96) 273
Okubo, A., see Kamei, S. (96) 97
Oyanagi, K., see Minami, R. (96) 107

Peabody, R.A., see Verch, R.L. (96) 125
Perini, J.M., Lebas, J., Roussel, P. and Biserte, G.
Evidence for heterogeneous or incomplete immunoglobulins in oligoclonal CSF studied by electroimmunofixation (96) 205
Peters, J.J., see Dawson, J. (96) 37
Pettit, B.R., see Lax, P.M. (96) 269

Rachmilewitz, E.A., see Yatziv, S. (96) 67
Raible, D.G., see Wacholtz, M.C. (96) 255
Rama Rao, P.B., see Latif, K.A. (96) 131
Reinke, C., see Meisler, M. (96) 91
Renato, L., see De Pirro, R. (96) 9
Rich, S.A., Ziegler, F.D. and Grimley, P.M.
An analysis of electrophoretic and microcolumn methods for the separation of hemoglobins A and A_2 (96) 113
Rodan, G.A., see Wacholtz, M.C. (96) 255
Rodan, S.B., see Wacholtz, M.C. (96) 255
Rose, G.A., see Kasidas, G.P. (96) 25
Roussel, P., see Perini, J.M. (96) 205

Saito, A., see Niwa, T. (96) 247
Sandler, M., see Lax, P.M. (96) 269
Sha'afi, R.I., see Wacholtz, M.C. (96) 255
Sizaret, P., Breslow, N. and 14 other participants
Equivalence between international units and mass units of alpha-fetoprotein — report of a collaborative study (96) 59
Smith, G.D., see Dawson, J. (96) 37
Sprengers, E.D. and Staal, E.J.
Acquired pyruvate kinase deficiency. The effect of maleic acid upon human erythrocyte pyruvate kinase (96) 79
Staal, E.J., see Sprengers, E.D. (96) 79
Statham, H.E. and Dubowitz, V.
Duchenne muscular dystrophy: ^{45}Ca exchange in cultured skin fibroblasts and the effect of calcium ionophore A23187 (96) 225
St. John. J., see Taylor, C.M. (96) 1

Takeda, E., see Kuroda, Y. (96) 139
Talafant, E. and Továrek, J.
Turbidimetric determination of lipoprotein-X in serum (96) 261
Taylor, C.M., Hann, J., St. John, J., Wallace, J.E. and Mawer, E.B.
1,25-Dihydroxycholecalciferol in human

serum and its relationship with other metabolites of vitamin D-3 (96) 1
Toshima, K., see Kuroda, Y. (96) 139
Továrek, J., see Talafant, E. (96) 261

Verch, R.L., Wallach, S. and Peabody, R.A.
Automated analysis of hydroxyproline with elimination of non-specific reacting substances (96) 125

Wacholtz, M.C., Raible, D.G., Jackowski, S., Rodan, S.B., Rodan, G.A. and Sha'afi, R.I.
Adenylate cyclase and ATPase activities in red cell membranes of patients and genetic carriers of Duchenne muscular dystrophy (96) 255
Wallace, J.E., see Taylor, C.M. (96) 1
Wallach, S., see Verch, R.L. (96) 125
Wilkinson, A.W., see Carr, G. (96) 73
Williams, J., see Bachorik, P.S. (96) 145
Wood, P.D.S., see Bachorik, P.S. (96) 145

Yabuuchi, H., see Okada, S. (96) 281
Yamanaka, M., see Kamei, S. (96) 97
Yatziv, S., Kahane, I., Abeliuk, P., Cividalli, G. and Rachmilewitz, E.A.
"Lysosomal" enzyme activities in red blood cells of normal individuals and patients with homozygous β-thalassemia (96) 67
Yutaka, T., see Okada, S. (96) 281

Ziegler, F.D., see Rich, S.A. (96) 113

CLINICA CHIMICA ACTA, VOL. 96 (1979)

SUBJECT INDEX

N-Acetyltransferase; Lymphocytes; Human; Newborn (96) 91
Acquired enzymopathy; Pyruvate kinase; Maleic acid (96) 79
Adenylate cyclase; Duchenne muscular dystrophy; Erythrocyte; ATPase (96) 255
Adrenaline; Noradrenaline; Plasma; Radioenzymatic assay; High pressure liquid chromatography; Chromatography (96) 233
Apoenzyme; Aspartate aminotransferase isoenzyme; Serum; Hepatic disease (96) 97
Arylsulfatases; Urinary excretion; Malnourishment; Vitamin A deficiency; (Children) (96) 131
Aspartate aminotransferase isoenzyme; Apoenzyme; Serum; Hepatic disease (96) 97
ATPase; Duchenne muscular dystrophy; Erythrocyte; Adenylate cyclase (96) 255
Automated analysis; Hydroxyproline; Elimination of non-specific reacting substances (96) 125
Automated total cholesterol; Plasma; Cholesterol; Serum calibration; Calibration factor; Reference cholesterol analysis; Libermann-Burchard reaction (96) 145

Breast neoplasms; Neoplasms; γ-Glutamyltransferase; Mastitis; Tumors (96) 37
Burn injury; Chromium excretion; Iron requirements; Trace metals (96) 73

Calcium; Muscular dystrophy; Ionophore; Fibroblasts; Tissue culture (96) 225
Calcium-heparin; Lipoprotein-X (LP-X); Cholestasis; Turbidimetry (96) 261
Calibration factor; Automated total cholesterol; Plasma; Cholesterol; Serum calibration; Reference cholesterol analysis; Libermann-Burchard reaction (96) 145
I-cell disease; Neuraminidase; (Liver; Brain) (96) 107
Cellulose acetate membrane electrophoresis; Serum protein; Electrophoresis; First derivative curve; Inverted second derivative curve; "M" component, monoclonal gammopathy (96) 273
Cerebrospinal fluid; Immunoglobulins, oligoclonal; Electrophoresis; Immunofixation (96) 205
Cholestasis; Lipoprotein-X (LP-X); Turbidimetry; Calcium-heparin (96) 261
Cholesterol; Automated total cholesterol; Plasma; Serum calibration; Calibration factor; Reference cholesterol analysis; Libermann-Burchard reaction (96) 145
Chromatography; Noradrenaline; Adrenaline; Plasma; Radioenzymatic assay; High pressure liquid chromatography (96) 233
Chromium excretion; Burn injury; Iron requirements; Trace metals (96) 73
Collagen biosynthesis; Immunoreactive prolyl hydroxylase protein; Galactosylhydroxylysyl glucosyltransferase; Prolyl hydroxylase; Dermatological diseases; Serum (96) 53

Collagen biosynthesis; Immunoreactive prolyl hydroxylase protein; Prolyl hydroxylase; Galactosylhydroxylysyl glucosyltransferase; Skin; Dermatological diseases (96) 43
Competitive protein binding assay; 1,25-Dihydroxycholecalciferol; 24,25-Dihydroxycholecalciferol; 25-Hydroxycholecalciferol; Nuclear receptor (96) 1
"M" component, monoclonal gammopathy; Cellulose acetate membrane electrophoresis; Serum protein; Electrophoresis; First derivative curve; Inverted second derivative curve (96) 273
Cultured skin fibroblast; Lysosomal hydrolase; Ultramicroassay of enzyme; β-Galactosidase deficiency; Mucolipidosis; GM_1-Gangliosidosis (96) 281

Dermatological diseases; Immunoreactive prolyl hydroxylase protein; Galactosylhydroxylysyl glucosyltransferase; Prolyl hydroxylase; Collagen biosynthesis; Serum (96) 53

Dermatological diseases; Immunoreactive prolyl hydroxylase protein; Prolyl hydroxylase; Galactosylhydroxylysyl glucosyltransferase; Skin; Collagen biosynthesis (96) 43
Dexamethasone receptors; (Rat kidney) (96) 9
1,25-Dihydroxycholecalciferol; 24,25-Dihydroxycholecalciferol; 25-Hydroxycholecalciferol; Nuclear receptor; Competitive protein binding assay (96) 1
24,25-Dihydroxycholecalciferol; 1,25-Dihydroxycholecalciferol; 25-Hydroxycholecalciferol; Nuclear receptor; Competitive protein binding assay (96) 1
Duchenne muscular dystrophy; Erythrocyte; Adenylate cyclase; ATPase (96) 255
Duodenal juice, human; Elastase, cathodal; Electroimmunoassay (96) 215

Elastase, cathodal; Duodenal juice, human; Electroimmunoassay (96) 215
Electroimmunoassay; Elastase, cathodal; Duodenal juice, human (96) 215
Electrophoresis; Cellulose acetate membrane electrophoresis; Serum protein; First derivative curve; Inverted second derivative curve; "M" component, monoclonal gammopathy (96) 273
Electrophoresis; Cerebrospinal fluid; Immunoglobulins, oligoclonal; Immunofixation (96) 205
Electrophoresis; Microcolumn methods; Hemoglobins A and A_2; (Separation) (96) 113
Elimination of non-specific reacting substances; Automated analysis; Hydroxyproline (96) 125
Erythrocyte; Duchenne muscular dystrophy; Adenylate cyclase; ATPase (96) 255
Erythrocyte; Lysosomal enzyme; β-Thalassaemia, homozygous; Hydrolase (96) 67

Fatty acid analysis; Leukemia cell; Hairy cell (96) 85

α-Fetoprotein; WHO standard; International units; Mass units; Methods of assay (96) 59
Fibroblasts; Calcium; Muscular dystrophy; Ionophore; Tissue culture (96) 225
First derivative curve; Cellulose acetate membrane electrophoresis; Serum protein; Electrophoresis; Inverted second derivative curve; "M" component, monoclonal gammopathy (96) 273

β-Galactosidase deficiency; Lysosomal hydrolase; Ultramicroassay of enzyme; Cultured skin fibroblast; Mucolipidosis; GM_1-Gangliosidosis (96) 281
Galactosylhydroxylysyl glucosyltransferase; Immunoreactive prolyl hydroxylase protein; Prolyl hydroxylase; Collagen biosynthesis; Dermatological diseases; Serum (96) 53
Galactosylhydroxylysyl glucosyltransferase; Immunoreactive prolyl hydroxylase protein; Prolyl hydroxylase; Skin; Collagen biosynthesis; Dermatological diseases (96) 43
GM_1-Gangliosidosis; Lysosomal hydrolase; Ultramicroassay of enzyme; Cultured skin fibroblast; β-Galactosidase deficiency; Mucolipidosis (96) 281
Gas chromatographic assay; Methylated catecholamines; Urine, human (96) 269
Gas chromatography-mass spectrometry; Mass fragmentography; Hydroxyphenolic acids; Uremia; Hemodialysis (96) 247
Gas-liquid chromatography; Mannitol; α-Methyl glucose; Internal standardization; Mass spectrometry (96) 265
Growth hormone; Somatomedin; Vitamin A; Sulphation (96) 241
γ-Glutamyltransferase; Neoplasms; Breast neoplasms; Mastitis; Tumors (96) 37
Glycollate; Urine; Plasma; Glycollic-acid oxidase (96) 25
Glycollic-acid oxidase; Glycollate; Urine; Plasma (96) 25

Hairy cell; Leukemia cell; Fatty acid analysis (96) 85
Hemodialysis; Gas chromatography-mass spectrometry; Mass fragmentography; Hydroxyphenolic acids; Uremia (96) 247
Hemoglobins A and A_2; Electrophoresis; Microcolumn methods; (Separation) (96) 113
Hepatic disease; Aspartate aminotransferase isoenzyme; Apoenzyme; Serum (96) 97
Heterozygotes; Histidase; Histidinemia; (Skin) (96) 139
High pressure liquid chromatography; Noradrenaline; Adrenaline; Plasma; Radioenzymatic assay; Chromatography (96) 233
Histidase; Heterozygotes; Histidinemia; (Skin) (96) 139
Histidinemia; Histidase; Heterozygotes; (Skin) (96) 139
Human; *N*-Acetyltransferase; Lymphocytes; Newborn (96) 91

Hydrolase; Lysosomal enzyme; Erythrocyte; β-Thalassaemia, homozygous (96) 67
25-Hydroxycholecalciferol; 1,25-Dihydroxycholecalciferol; 24,25-Dihydroxycholecalciferol; Nuclear receptor; Competitive protein binding assay (96) 1
Hydroxyphenolic acids; Gas chromatography-mass spectrometry; Mass fragmentography; Uremia; Hemodialysis (96) 247
Hydroxyproline; Automated analysis; Elimination of non-specific reacting substances (96) 125

Immunofixation; Cerebrospinal fluid; Immunoglobulins, oligoclonal; Electrophoresis (96) 205
Immunoglobulins, oligoclonal; Cerebrospinal fluid; Electrophoresis; Immunofixation (96) 205
Immunoreactive prolyl hydroxylase protein; Galactosylhydroxylysyl glucosyltransferase; Prolyl hydroxylase; Collagen biosynthesis; Dermatological diseases; Serum (96) 53
Immunoreactive prolyl hydroxylase protein; Prolyl hydroxylase; Galactosylhydroxylysyl glucosyltransferase; Skin; Collagen biosynthesis; Dermatological diseases (96) 43
Internal standardization; Mannitol; α-Methyl glucose; Gas-liquid chromatography; Mass spectrometry (96) 265
International units; α-Fetoprotein; WHO standard; Mass units; Methods of assay (96) 59
Inverted second derivative curve; Cellulose acetate membrane electrophoresis; Serum protein; Electrophoresis; First derivative curve; "M" component, monoclonal gammopathy (96) 273
Ionophore; Calcium; Muscular dystrophy; Fibroblasts; Tissue culture (96) 225
Iron requirements; Burn injury; Chromium excretion; Trace metals (96) 73

Libermann-Burchard reaction; Automated total cholesterol; Plasma; Cholesterol; Serum calibration; Calibration factor; Reference cholesterol analysis (96) 145
Lipoprotein-X (LP-X); Cholestasis; Turbidimetry; Calcium-heparin (96) 261
Leukemia cell; Hairy cell; Fatty acid analysis (96) 85
Lymphocytes; *N*-Acetyltransferase; Human; Newborn (96) 91
Lysosomal enzyme; Erythrocyte; β-Thalassaemia, homozygous; Hydrolase (96) 67
Lysosomal hydrolase; Ultramicroassay of enzyme; Cultured skin fibroblast; β-Galactosidase deficiency; Mucolipidosis; GM_1-Gangliosidosis (96) 281

Maleic acid; Pyruvate enzymopathy; Acquired enzymopathy (96) 79
Malnourishment; Urinary excretion; Arylsulfatases; Vitamin A deficiency; (Children) (96) 131
Mannitol; α-Methyl glucose; Internal standardization; Gas-liquid chromatography; Mass spectrometry (96) 265
Mass fragmentography; Gas chromatography-mass spectrometry; Hydroxyphenolic acids; Uremia; Hemodialysis (96) 247
Mass spectrometry; Mannitol; α-Methyl glucose; Internal standardization; Gas-liquid chromatography (96) 265
Mass units; α-Fetoprotein; WHO standard; International units; Methods of assay (96) 59
Mastitis; Neoplasms; γ-Glutamyltransferase; Breast neoplasms; Tumors (96) 37
Methods of assay; α-Fetoprotein; WHO standard; International units; Mass units (96) 59
Methylated catecholamines; Gas chromatographic assay; Urine, human (96) 269
α-Methyl glucose; Mannitol; Internal standardization; Gas-liquid chromatography; Mass spectrometry (96) 265
Microcolumn methods; Electrophoresis; Hemoglobins A and A_2; (Separation) (96) 113
Monoamine oxidase; Platelet count; Platelet protein method; (Comparison) (96) 15
Mucolipidosis; Lysosomal hydrolase; Ultramicroassay of enzyme; Cultured skin fibroblast; β-Galactosidase deficiency; GM_1-Gangliosidosis (96) 281
Muscular dystrophy; Calcium; Ionophore; Fibroblasts; Tissue culture (96) 225

Neoplasms; γ-Glutamyltransferase; Breast neoplasms; Mastitis; Tumors (96) 37
Neuraminidase; I-cell disease; (Liver; Brain) (96) 107
New born; *N*-Acetyltransferase; Lymphocytes; Human (96) 91
Noradrenaline; Adrenaline; Plasma; Radioenzymatic assay; High pressure liquid chromatography; Chromatography (96) 233
Nuclear receptor; 1,25-Dihydroxycholecalciferol; 24,25-Dihydroxycholecalciferol;

25-Hydroxycholecalciferol; Competitive protein binding assay (96) 1

Plasma; Automated total cholesterol; Cholesterol; Serum calibration; Calibration factor; Reference cholesterol analysis; Libermann-Burchard reaction (96) 145

Plasma; Glycollate; Urine; Glycollic-acid oxidase (96) 25

Plasma; Noradrenaline; Adrenaline; Radioenzymatic assay; High pressure liquid chromatography; Chromatography (96) 233

Platelet count; Monoamine oxidase; Platelet protein method; (Comparison) (96) 15

Platelet protein method; Monoamine oxidase; Platelet count; (Comparison) (96) 15

Prolyl hydroxylase; Immunoreactive prolyl hydroxylase protein; Galactosylhydroxylysyl glucosyltransferase; Collagen biosynthesis; Dermatological diseases; Serum (96) 53

Prolyl hydroxylase; Immunoreactive prolyl hydroxylase protein; Galactosylhydroxylysyl glucosyltransferase; Skin; Collagen biosynthesis; Dermatological diseases (96) 43

Pyruvate kinase; Acquired enzymopathy; Maleic acid(96) 79

Radioenzymatic assay; Noradrenaline; Adrenaline; Plasma; High pressure liquid chromatography; Chromatography (96) 233

Reference cholesterol analysis; Automated total cholesterol; Plasma; Cholesterol; Serum calibration; Calibration factor; Libermann-Burchard reaction (96) 145

Serum; Aspartate aminotransferase isoenzyme; Apoenzyme; Hepatic disease (96) 97

Serum; Immunoreactive prolyl hydroxylase protein; Galactosylhydroxylysyl glucosyltransferase; Prolyl hydroxylase; Collagen biosynthesis; Dermatological diseases (96) 53

Serum calibration; Automated total cholesterol; Plasma; Cholesterol; Calibration factor; Reference cholesterol analysis; Libermann-Burchard reaction (96) 145

Serum protein; Cellulose acetate membrane electrophoresis; Electrophoresis; First derivative curve; Inverted second derivative curve; "M" component, monoclonal gammopathy (96) 273

Skin; Immunoreactive prolyl hydroxylase protein; Prolyl hydroxylase; Galactosylhydroxylysyl glucosyltransferase; Collagen biosynthesis; Dermatological diseases (96) 43

Somatomedin; Growth hormone; Vitamin A; Sulphation (96) 241

Sulphation; Somatomedin; Growth hormone; Vitamin A (96) 241

β-Thalassaemia, homozygous; Lysosomal enzyme; Erythrocyte; Hydrolase (96) 67

Tissue culture; Calcium; Muscular dystrophy; Ionophore; Fibroblasts (96) 225

Trace metals; Burn injury; Chromium excretion; Iron requirements (96) 73

Tumors; Neoplasms; γ-Glutamyltransferase; Breast neoplasms; Mastitis (96) 37

Turbidimetry; Lipoprotein-X (LP-X); Cholestasis; Calcium-heparin (96) 261

Ultramicroassay of enzyme; Lysosomal hydrolase; Cultured skin fibroblast; β-Galactosidase deficiency; Mucolipidosis; GM_1-Gangliosidosis (96) 281

Uremia; Gas chromatography-mass spectrometry; Mass fragmentography; Hydroxyphenolic acids; Hemodialysis (96) 247

Urinary excretion; Arylsulfatases; Malnourishment; Vitamin A deficiency; (Children) (96) 131

Urine; Glycollate; Plasma; Glycollic-acid oxidase (96) 25

Urine, human; Gas chromatographic assay; Methylated catecholamines (96) 269

Vitamin A; Somatomedin; Growth hormone; Sulphation (96) 241

Vitamin A deficiency; Urinary excretion; Arylsulfatases; Malnourishment; (Children) (96) 131

WHO standard; α-Fetoprotein; International units; Mass units; Methods of assay (96) 59
